

EEL

DESCRIPTION:

EEL (Extraction Equipment Lime-Out) is a liquid, sulfamic acid, and high performance descaler. Formulated with corrosion inhibitors, EEL will quickly loosen and dissolve build-up inside extractors, restoring trouble free extraction. Sulfamic acid is safe on all metal parts, making the usability of this product very versatile - use on problem areas in your kitchen or bathroom to penetrate tough lime and calcium build-up to make your faucets, drains, and more shine again!

DIRECTIONS:

Portable: Remove all screens before use. Pour 1/2 gallon of EEL into solution tank. Engage system until green liquid is discharged. Allow to dwell 30 minutes. Continue discharging solution until exhausted. Rinse with water until solution appears clear.

Truckmount: Insert solution intake hose directly into EEL and open meter completely. Engage system until green liquid is discharged. Allow to dwell 30 minutes. Continue discharging solution until exhausted. Rinse with water until solution appears clear.

PACKAGING OPTIONS:

- 4/1 gal.

SPECIFICATIONS:

Appearance: Green liquid

Odor: Characteristic

pH: 1

Storage: Store at room temperature away from heat, sparks, or flames.

Freeze/Thaw: Will recover from freezing
