

# KRUSH-GEL

## DESCRIPTION:

For tough spots on difficult fabrics or in confined areas, traditional liquid spotters and ink removers can be difficult to apply or use effectively. Krush-Gel provides excellent spotting from its combination of surfactants and solvents (including D'limonene) merged in a thick gel that can sit on a surface and be easily applied and extracted. Krush-Gel works on hard surfaces too, penetrating common stains to soften them up before cleaning. Use Krush-Gel for removing adhesives, cosmetics, grease, gum, tar, and more!

## DIRECTIONS:

Apply Krush-Gel directly onto the spot and gently spread over the affected area. Allow to sit 2 minutes for dissolving action to take place. Agitate the area to break apart and remove the offending spot. Rinse the area with water to remove any additional gel and then extract.

## PACKAGING OPTIONS:

- 12/pts.

## SPECIFICATIONS:

**Appearance:** Clear colorless gel

**Odor:** Citrus

**pH:** N/A

**Storage:** Store in well-closed containers away from open flame or heat.

**Freeze/Thaw:** Will not freeze.
