

KRUSH

DESCRIPTION:

Designed to be one of our safest, easiest to use presprays, Krush removes common stains and spots with ease thanks to its combination of d'limonene and non-ionic surfactants. It uses biodegradable components and avoids the corrosive additions used in harsher detergents so cleaners don't have to worry about fumes and other hazards when in use. Krush also contains no cationic surfactants, therefore being safe to use on StainMaster and other stain-resistant carpets and rugs.

DIRECTIONS:

For use as a spotter: Dilute Krush 1:10 (12 oz. per gallon) for most spots and stains. Spray directly onto the affected area and let sit for 3 to 5 minutes. Then, use a soft bristled brush to get out the stain or soil. Rinse/extract with DSC's rinse agent, Remove, afterwards to avoid redeposition.

For use as a prespray: Dilute Krush 1:20 (6 oz. per gallon) for larger areas or pretreating a room. Apply using a sprayer, then brush or buff into the carpet before following up with a shampoo or other detergent. Extract with DSC's rinse agent, Remove, to avoid soil redeposition.

PACKAGING OPTIONS:

- 4/1 gal.

SPECIFICATIONS:

Appearance: Clear orange liquid

Odor: Citrus

pH: 9

Storage: Store in well closed containers away from direct sunlight.

Freeze/Thaw: Will recover from freezing
