

# DSC LASER

## DESCRIPTION:

A specialized spotter, Laser is an easy to use ink, dye, and pigment remover from most carpets and fabric. It packs a variety of solvents that can remove most common ink stains from everyday sources like markers (even permanent) and pens, in addition to other hard to remove stains.

## DIRECTIONS:

For heavy stains: Apply Laser directly onto the stain. Do not soak the fibers, just apply enough to dampen the fabric. Agitate the stained fabric with a bone knife to work Laser into the stain. Next, apply some additional Laser onto a clean cloth and gently brush the stain with it. Work from the outside of the stain in to prevent the stain from spreading.

For lighter or more immediate stains: Apply Laser onto a clean cloth and gently brush the affected area with it. Use the cloth to keep the area damp so the ink doesn't set in the fabric. Do not soak the fibers, overwetting can lead to the stain spreading.

## PACKAGING OPTIONS:

- 12/pts.

## SPECIFICATIONS:

**Appearance:** Clear colorless liquid

**Odor:** Banana

**pH:** N/A

**Storage:** Store in well-closed containers away from direct sunlight.

**Freeze/Thaw:** Does not freeze
