

DSC R-6

R-6 has been specifically designed to meet the requirements of stain resist carpeting. Contains no brighteners or cationic compounds. R-6 is a low foaming, high performance truckmount carpet detergent that can be used at very low concentrations in portables and truckmount extractor systems which operate in the temperature range of below 150° F. Dissolves so easily many are switching from liquids for this more cost effective product. Use Sure-Pass, our prespray and traffic spotter in conjunction with R-6 and Fiber -Tec for a complete program to maintain stain resistant carpets. All these products will not affect the stain resistant properties of the new generation carpets yet allows for the fast, safe and effective way to maintain them. Be sure to follow the carpet manufacturer's recommended cleaning procedure, including the temperature abrasion limitations.

Directions:

If carpet is under warranty, check the carpet manufacturer's limitations for temperature and abrasion. Usually temperatures not over 150° F at the carpet and no harsh scrubbing machines. For optimum cleaning, chemical solution should be mixed 1 ½ lb. of detergent per 5 gallons of water and metered at 5 gallons per hour.

HAZARD WARNING: Corrosive to eye; Skin irritant.

PRECAUTIONS: Wear eye and skin protection. Do not ingest.

FIRST AID: Contact - Flush with water. Ingestion - Give water. Get medical help in all cases.

READ SAFETY DATA SHEET BEFORE USE.

KEEP OUT OF REACH OF CHILDREN.

DO NOT REUSE THIS CONTAINER.

Appearance.....	Slightly yellow powder
Odor.....	Lemon
pH.....	9
Dilution.....	See Directions
Packaging.....	40#
Hard Water Tolerance.....	Excellent
Density.....	62#/cu. ft.
Storage.....	Keep dry in closed containers.
