

SURE-SOLV

DESCRIPTION:

Formulated with d'Limonene, Sure-Solv is DSC's concentrated, "all-in-one" spotter formula. Sure-Solv will penetrate and remove almost any stain on any surface, making this product the answer when other spotters fail. Sure-Solv is especially excellent for removing adhesives, cosmetics, grease, gum, tar and other water or oil based stains. If you can only take one spotter on the job, Sure-Solv is your solution.

DIRECTIONS:

CAUTION! Sure-Solv is not meant for use on delicate fabrics and care must be taken on vinyl and leather surfaces. Test a small amount in an inconspicuous area to check for dye loss or damage before use.

For spotting: Apply Sure-Solv to a clean piece of cloth or towel, then blot the stain away. If there is sticky adhesive or residue on the stain, apply no more than a capful of Sure-Solv directly on the substance. This will soften the material and make it easier to scrape away from the surface.

For use as a prespray: Dilute 1:32 (4 oz. per gallon) and spray liberally onto the affected area. Allow to set for 5 minutes before extracting and rinsing.

PACKAGING OPTIONS:

- 4/1 gal.

SPECIFICATIONS:

Appearance: Clear liquid

Odor: Citrus

pH: 4

Storage: Store in well closed containers away from direct sunlight or heat.

Freeze/Thaw: Will recover
