

# TROUNCE

## DESCRIPTION:

You never know what to expect when showing up to a job. Lipstick? Adhesives? Food stains? These stains can take up valuable time as you try multiple products to remove them, but thankfully, there's Trounce. Trounce is the most versatile spotter you can have, removing a wide variety of stains, from oil based cosmetics to food dyes and common adhesives. Its combination of solvents allows it to dry fast, never setting the spot. Don't waste your time trying multiple products on the same stain - use Trounce and get it done.

## DIRECTIONS:

Use a clean rag or sponge to apply Trounce directly onto the affected area, do not dilute. Blot out stains with rag or scrape away adhesives or debris with a bone knife. Do not rinse, Trounce will evaporate the area quickly.
